ADAPTOGEN-R3™

DO YOU FEEL STRESSED FROM TIME TO TIME?

Introducing an outstanding class of herbs called adaptogens. An adaptogen is an herb that has the unique ability to “adapt” its function according to your body’s specific needs, such as promoting a healthy response to occasional stress. Premier Research Labs’s Adaptogen-R3™ is a comprehensive, multi-botanical formula that promotes the entire adaptogenic process while helping to moderate occasional mental and physical stress.

THE GOLDEN ROOT

Adaptogen-R3™ features the well-known botanical adaptogen, Rhodiola rosea. Rhodiola, also known as Golden root, is a hardy Siberian plant that has been used traditionally for hundreds of years. Extensive research has shown that Rhodiola offers a range of valuable properties including support for occasional mental and physical stress as well as cardiovascular and metabolic health.

THE PERFECT ADAPTOGENIC BLEND

In addition to Rhodiola, Rhodiola Pro Blend™, one of three blends contained in Adaptogen-R3™, also features the famous botanicals: Eleuthero root, American Ginseng root, Opuntia and Maca root - to deliver the perfect adaptogenic blend. Two additional key biocompatible blends complete the “Premier Quality Effect” of this product.

All these benefits with no added excipients! And no added, questionable fillers such as magnesium stearate! Just pure vegetarian capsules contained in a custom-color Violite bottle that protects precious nutrients by blocking light-damaging frequencies.
