

Medi-Clay-FX™

Advanced Detoxification Support

Medi-Clay-FX™ delivers pristine-quality calcium bentonite clay in capsule form for whole-body detoxification support. Bentonite clay has a long history of use in traditional healing practices to support the health of the gastrointestinal tract, kidneys, skin, and immune system.*

Bentonite clay works by adsorbing, or binding to, toxins and bacteria in the body. Bentonite clay possesses a negative charge, meaning its molecules have gained extra electrons, and can attract positively charged substances, which include some toxins and bacteria. This unique property allows the clay to bind to and carry away harmful substances from the body as the clay is eliminated naturally.*

Research has shown that bentonite clay can adhere to aflatoxins, a group of substances produced by fungi that is found in some food like wheat, corn, peanuts, and tree nuts as well as culinary spices, including turmeric and cayenne pepper. Aflatoxins specifically target the liver and can suppress immune function and damage tissues.

High quality products, like Medi-Clay-FX™, are clinically effective tools used to reduce aflatoxin levels in the body, reducing the occurrence of problematic conditions resulting from chronic exposure. Most bentonite clays are sodium-based, but we are proud to deliver pristine and potent calcium bentonite clay. Medi-Clay-FX™ features freshwater-based calcium bentonite, derived from an ancient underwater volcanic site.

Benefits

- Possesses powerful absorptive detoxification properties.*
- Binds to and detoxifies aflatoxins, lowering levels in the blood.*
- May promote antibacterial immune activity.*

Highlights

- Sourced from pristine-quality, freshwater-sourced calcium bentonite clay, not sodium bentonite clay, for superior toxin adsorption power.
- Derived from the site of an ancient underwater volcanic eruption, rich with naturally charged elements.
- Clinically researched for its ability to bind to and detoxify endotoxins, as well as selective pesticides and antibiotics.

Recommended Use

- For relief from acute or chronic exposure to food-borne or environmental toxins as well as elevated endotoxin levels, take 1 capsule 3 times daily with at least 4 ounces of purified water, or use as directed by a health professional.
