

Premier HCL Activator

Optimize Digestive Health with Advanced Plant-Based Ingredients*

Overview

Normal hydrochloric acid levels can naturally decrease with age, impacting the digestion and absorption of nutrients. Premier HCL Activator™ is formulated to enhance digestive efficiency when used alongside Premier HCL, which provides Betaine Hydrochloride to support the activation of pepsin for nutrient breakdown. Research indicates that while Betaine Hydrochloride is beneficial, it may not fully compensate for reduced HCL production, and an optimal gastric pH range of 1.5 to 3.5 is essential for effective protein digestion.

Unlike most digestive support supplements, Premier HCL Activator™ offers plant-based efficacy and is completely free from animal products, utilizing a comprehensive blend of botanical ingredients to effectively and naturally support digestive health. This formula includes fungal enzymes, studied for their ability to help maintain an acidic gastric environment, supporting efficient digestion of complex nutrients like proteins and cereal grains, and promoting overall gut health. Enhanced with a robust blend of polyphenol-rich ingredients with antioxidant-like properties like turmeric, cinnamon, and tomatoes, it promotes a healthy gut microbiome and supports natural gastric acid production. Used with Premier HCL™, Premier HCL Activator™ helps optimize the stomach's acidity, enhancing enzyme activity and nutrient assimilation for improved digestive health.

Recommended Use

- For optimal digestive support, take 1 capsule of Premier HCL Activator™ with each meal, in conjunction with Premier HCL™, to maximize digestion and nutrient assimilation.

Benefits

- Optimizes HCl Production:** Enhances natural gastric acid production, crucial for nutrient absorption and effective digestion.*
- Enhances Digestive Comfort:** Reduces occasional digestive discomforts such as gas and bloating, especially after consuming protein and fat-rich meals.*
- Supports Digestive Wellness:** Incorporates turmeric and cinnamon, known for their traditional roles in promoting gut comfort.*
- Microbiome Enhancement:** Polyphenols from tomatoes, turmeric, and cinnamon promote a balanced gut microbiome, supporting overall digestive wellness.*

Highlights

- Clinically Supported:** Supported by research, fungal enzymes aid in breaking down complex proteins during digestion, enhancing overall digestive efficiency.*
- Safety Assured:** Manufactured under strict quality controls to ensure the absence of mycotoxins and contaminants, adhering to FDA guidelines for safety.
- Comprehensive Action:** Enhances the stomach's acidic environment for improved food breakdown and nutrient absorption when used with Premier HCL™.*
