HAVE YOU HEARD . . .

about our amazing FermExcel-100 products?

Probiotic-Fermented Nutrients

These statements have not been evaluated by the Food and Drug Administration. These products are not intended to diagnose, treat, cure or prevent any disease.

Fermentation's Long History

The use of fermentation dates back to ancient times. It is an old culinary art that has been used for thousands of years by many cultures. The reason for this popularity is that fermentation enhances the digestibility of nutrients, **making them more bioavailable**. Fermentation helps ensure that the digestion and absorption of plant nutrients is optimized.

Fermented SuperStar Nutrients

What if you took already awesome nutrients and made them even more bioavailable? Welcome to fermentation! The process of fermentation breaks down plant compounds to release their full nutritional potency. The end result helps to ensure maximum absorption and digestion. Fermentation of organic greens and organic grasses can be especially helpful because it helps release a broad spectrum of the plant's nutritional elements for ease of uptake and assimilation.

The "FermExcel-100™" Process

Our fermented formulas are proudly crafted and thoroughly tested by our manufacturer's expert team of highly trained laboratory scientists in a state-of-the-art laboratory to ensure quality, potency, purity and composition. We offer a specific range of nutritional products that have been fermented using a multifaceted fermentation process called the "FermExcel-100™" process. The use of both ancient fermentation methods and modern parameters are practiced to yield peak nutritional elements and digestive value.

The "FermExcel-100™" Process is not just one process but is tailored individually to the type of plant nutrients that are being fermented. Each plant nutrient undergoes a carefully crafted fermentation process that encompasses specific scientific measurements such as humidity, timing, temperature levels and the use of the most ideal starting probiotic culture in order to create exceptional nutrient quality and potency.

***Our signature FermExcel-100™
line is an industry first!***

Experience a quantum leap in your health and vitality.

The "FermExcel-100™" Process: Probiotic-Cultured Delivery System

The "FermExcel-100™" fermentation process is a revolutionary, highly absorbable delivery system made with unique probiotic-cultured technology specific to the raw material it is culturing. It is the first nutraceutical preparation designed to assure absorption of the full spectrum of phytonutrients through a micro-cultured delivery system.

Using only premier quality ingredients that have been micro-cultured with specifically selected probiotics, "FermExcel-100™" products can be rapidly absorbed so they immediately go to work. Even those with poor digestion can enjoy the full benefits of "FermExcel-100™" highly bio-available, fermented nutrients. No other form of dietary supplement can offer this type of phytonutrient bioavailability and quality.

Our ND™ dietary supplements are proudly produced by PRL through a probiotic fermentation process, which uses both ancient fermentation methods and modern techniques to yield peak nutritional results. This process is individually tailored to the plant being fermented with stringent product-specific temperature, humidity, and time requirements. With a long, successful history in introducing liquid, probiotic-rich dietary supplements, Premier Research Labs' is proud to introduce our newest products: fermented dietary supplements in capsule, powder and liquid form.

Our newest probiotic-fermented powder and capsule products:

- **Premier Fermented Beets**
- **Premier Fermented Greens (caps)**

R1.1

- ✓ 100% fermented organic plant blend
- ✓ Easily digested and highly bio-available
- ✓ Prebiotic, probiotic and postbiotic activity
- ✓ Full spectrum of naturally occurring vitamins and minerals
- ✓ Promotes the natural alkalinity and pH of the body

These statements have not been evaluated by the Food and Drug Administration. These products are not intended to diagnose, treat, cure or prevent any disease.

Live Prebiotic, Probiotic And Postbiotic Activity

Premier Fermented Greens is a spectacular nutritional industry first -- providing a convenient gluten free, 100% fermented plant blend with live prebiotic, probiotic and postbiotic activity. Our prized, vegan-friendly superfood features carefully air-dried greens at low temperature: Fermented Organic Barley Grass, Fermented Organic Oat Grass, Fermented Organic Kale, and Fermented Organic Chlorella to provide the full spectrum of naturally occurring vitamins and minerals that help promote the natural alkalinity and pH of the body. This **masterpiece of prebiotics** is scientifically backed with the probiotic bacteria, *Lactobacillus reuteri*, to supplement the health of your intestinal microbiome in order to promote overall health and wellbeing.

Delivers Postbiotic Activity

The fermentation of organic greens also generates highly desirable postbiotics. Generated from probiotic bacteria, postbiotic metabolites are the biochemical flux that can initiate thousands of chemical reactions in every one of your cells throughout the body. We now know that these **probiotic-produced postbiotic compounds** play extraordinary roles in regulating and maintaining the body's healthy internal microbiome. Taking Premier Fermented Greens on a regular basis helps supply an entire spectrum of prebiotics, probiotics and postbiotics to promote gut health.

Fermented Foods And The Microbiome

In humans, fermentation happens when the microbes, also known as probiotics, throughout the gastrointestinal tract are working hard to “predigest” the food you eat. This process of fermentation breaks down plant compounds to release their full nutritional potency, which makes elements such as vitamins, minerals, and antioxidants more bioavailable.

These statements have not been evaluated by the Food and Drug Administration. These products are not intended to diagnose, treat, cure or prevent any disease.

- ✓ 100% Fermented organic whole beet root powder
- ✓ Naturally occurring dietary nitrates
- ✓ Supports a healthy cardiovascular system
- ✓ Promotes healthy blood pressure already in the normal range
- ✓ Promotes healthy gut microbiota

These statements have not been evaluated by the Food and Drug Administration. These products are not intended to diagnose, treat, cure or prevent any disease.

Naturally Occurring Dietary Nitrates

Premier Fermented Beets provides a 100% immaculately fermented, organic whole beet root powder that delivers a potent, bioavailable source of **naturally occurring dietary nitrates**. As we age, we become less efficient in the production and conversion of nitrates to nitric oxide and thus, our nitric oxide levels naturally decline.

Nitric Oxide Delivers A Wide Range Of Health Benefits

Nitric oxide has been widely reported by science to play a critical role in supporting a **healthy cardiovascular system** as well as **promoting energy, maintaining heart health**, and **supporting blood circulation**, including **promoting healthy blood pressure** already within the normal range.

Fermented Beets Is Recognized By Science

Nitric oxide is produced by the inner lining of the blood vessels called the endothelium and acts as a messenger molecule to promote healthy vasodilation and constriction to support oxygen levels in the blood and also healthy blood pressure already within the normal range. Fermented beets is recognized by science as one of the **healthiest vegetables on the planet and helps promote healthy gut microbiota and metabolic activity**. Some suggest they can feel it working right away!

Feed Your MicroBiome

In his book, "The Mind-Gut Connection", Dr. E. Meyer points out that the specific host bacteria in your own personal microbiome help transform the food you eat into hundreds of thousands of individual metabolites. To keep your microbiome at its healthiest, you must feed it well. Since different bacteria produce different kinds of metabolites, consuming a diversity of different kinds of probiotic bacteria can help create a healthier microbiome.

These statements have not been evaluated by the Food and Drug Administration. These products are not intended to diagnose, treat, cure or prevent any disease.

R1.0

- ✓ Probiotic-fermented organic turmeric & ginger
- ✓ Provides maximum bioavailability
- ✓ Maintains healthy digestion
- ✓ Supports a healthy inflammatory response
- ✓ Promotes cardiovascular health

These statements have not been evaluated by the Food and Drug Administration. These products are not intended to diagnose, treat, cure or prevent any disease.

Highly Absorbable Probiotic-Fermented Organic Turmeric

Premier Fermented Turmeric Plus is a revolutionary, highly absorbable probiotic-fermented organic turmeric rhizome and organic fermented ginger powder in their full-spectrum state that has been cultivated with our signature probiotic-fermented delivery system.

Provides Maximum Bioavailability

Probiotic fermentation provides maximum bioavailability, digestion and absorption. For centuries, turmeric has been the quintessential herb choice for promoting liver health, maintaining healthy digestion and supporting a healthy inflammatory response and cardiovascular health. One of the main keys to turmeric's nutritional benefits has been shown to be its high concentration of natural compounds known as curcuminoids.

Delivers The Full Spectrum

However, the active components of turmeric called curcuminoids, have poor water solubility and poor permeability, which may result in low absorption rates in the gut and which can also limit its systemic availability. By fermenting both organic turmeric and ginger with our unique probiotic culture, this process is able to predigest the herbs' naturally occurring compounds to deliver the full spectrum of these highly desirable phyto-components at their full activity and in their most bioavailable forms.

Quality Is The Key To Fermentation

Before the fermentation process begins, our manufacturer first authenticates the botanical identity of the raw material to be fermented (this helps to exclude raw materials that may have been adulterated with the wrong species or other look-alike herbs). Next, they complete an in-depth phytoforensic screening where they inspect for undesirable inorganic materials such as herbicides and pesticides.

These statements have not been evaluated by the Food and Drug Administration. These products are not intended to diagnose, treat, cure or prevent any disease.

R1.0

- ✓ Six different fermented organic mushrooms
- ✓ Easily digestible
- ✓ Maximum bioavailability
- ✓ Immunomodulating polysaccharides
- ✓ Naturally occurring vitamins and minerals

These statements have not been evaluated by the Food and Drug Administration. These products are not intended to diagnose, treat, cure or prevent any disease.

Proven Immunomodulating Mushrooms

Premier Fermented Mushroom Blend features a full array of organically grown, premier quality fermented mushrooms (six different types) in their full-spectrum state for maximum bioavailability, digestion and absorption. Current research demonstrates that the human immune system can be given excellent support by using a mixture of polysaccharides from several proven immunomodulating mushrooms. The pre-digested, fermented organic mushrooms in this product offer a vast array of naturally occurring vitamins, minerals and immunomodulating polysaccharides.

Easily Digested And Immediately Absorbed

Scientific research shows that the mushroom's immune-supporting polysaccharides are located within the cell walls of an indigestible fiber called chitin. Since chitin is very difficult for the body to digest in order to release its nutritional payload, it must be either cooked, hot water extracted or fermented. The mushrooms in Premier Fermented Mushroom Blend have been micro-cultured through a unique probiotic fermentation process so they can be easily digested and immediately absorbed to provide their full spectrum of beneficial immune support compounds such as polysaccharides at their peak activity and in their most bioavailable form.

Micro-Cultured With Specifically Selected Probiotics

Using only quantum ingredients that have been micro-cultured with specifically selected probiotics, FermExcel-100™ products can be rapidly absorbed so they immediately go to work.

B12-ND™

Probiotic-Fermented B12

A Rich Source of Vitamin B12

- ✓ Probiotic fermented B12
- ✓ Blood circulating form of B12
- ✓ Cognitive Health
- ✓ Homocysteine Modulation
- ✓ Neurological Function
- ✓ Energy

R7.1

These statements have not been evaluated by the Food and Drug Administration. These products are not intended to diagnose, treat, cure or prevent any disease.

Fully Active Co-Enzymes Of Vitamin B12

B12-ND™ contains fully active co-enzymes of vitamin B12 that are rich in the desirable “blood circulating forms” of vitamin B-12, namely, methylcobalamin, adenosylcobalamin and hydroxycobalamin. While the body is able to absorb food-source vitamin B12, it must further convert it to these three coenzyme forms in order for it to become metabolically active.

Allows Rapid Oral Delivery

When vitamin B12 is provided as methylcobalamin, it is already in the biologically active form and is able to yield optimal bioavailability and tissue retention. B12-ND™ is a probiotic-fermented, vitamin B12 formula that uses a unique probiotic culture which allows rapid oral delivery with superior bioenergetic properties. Our probiotic fermentation is cultured without the use of animal sources, making it suitable for vegetarians and vegans

Supports Healthy Brain Cell Activity

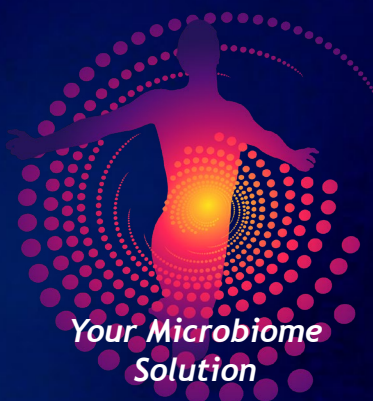

The fully active co-enzymes of vitamin B12, specifically methylcobalamin, may support healthy brain cell activity including memory, mood and cognitive health. In addition, methylcobalamin promotes neurological functions by encouraging protein synthesis to sustain healthy nerve cells.

Introducing ND Technology

Premier Research Labs also introduced the innovative concept of “ND” Technology where raw materials are probiotic-fermented as liquids. Our ND™ product line features the following probiotic-fermented liquids:

- B12-ND
- Green Tea-ND™
- Max B-ND™
- Premier Resveratrol
- Gallbladder-ND™
- Cardio-ND™
- Melatonin-ND

Our ND™ dietary supplements are proudly produced by our manufacturer through a probiotic fermentation process, which uses both ancient fermentation methods and modern techniques to yield peak nutritional results. This process is individually tailored to the plant being fermented with stringent product-specific temperature, humidity, and time requirements.

These statements have not been evaluated by the Food and Drug Administration. These products are not intended to diagnose, treat, cure or prevent any disease.

R1.0

- ✓ Organically Cultured Apple Cider Vinegar (ACV)
- ✓ Low temperature, air-dried ACV
- ✓ No maltodextrin
- ✓ Helps support the natural alkalinity of the body
- ✓ Supplies postbiotic support

These statements have not been evaluated by the Food and Drug Administration. These products are not intended to diagnose, treat, cure or prevent any disease.

Organically Cultured Apple Cider Vinegar (ACV)

Premier ACV Caps offers the most pristine, unheated, **organically cultured** Apple Cider Vinegar (ACV) cultured with our signature probiotic-cultured technology. It delivers all of the outstanding benefits of low temperature, air-dried apple cider vinegar that has been dried on rice extract (not maltodextrin), then placed into capsules for convenient use. The acetic acid levels are carefully maintained between 4-9% (each batch may somewhat vary).

Delivering Naturally Occurring “Postbiotics”

The organically cultured apple cider vinegar in Premier ACV Caps is capable of delivering **naturally occurring “postbiotics”** in their original form without additives. “Postbiotics” is a term that refers to the vast array of organic compounds that are naturally produced by the metabolic activity of probiotic bacteria. Premier ACV Caps **delivers a significant amount of naturally occurring organic acid substrates (known as postbiotics)**, which includes acetic, citric, formic, lactic, malic and succinic acids.

Supports The Body’s Internal, Intestinal Microbiome

Premier ACV Caps is a one-of-a-kind nutraceutical preparation that offers the most preferred form of apple cider vinegar to **help support the natural alkalinity of the body** while delivering postbiotic support to the body’s internal, intestinal microbiome.

What Are “Postbiotics”?

“Postbiotics” is a term that refers to the vast array of metabolic byproducts produced from probiotic bacteria that have enormous biologic activity in the gut and thus, influence many of your body’s vital functions. We now know that these probiotic-produced postbiotic compounds play impressively important roles in regulating and maintaining the body’s healthy internal microbiome. Postbiotic metabolites are the biochemical flux that initiate thousands of chemical reactions in every one of your cells throughout the body.

Full Spectrum Probiotic Formulas

MicroBiome-18™ is a new genre of full spectrum probiotic formulas that offers 18 different beneficial bacterial strains with a guaranteed 15 billion CFUs per capsule. This advanced probiotic support formula is based on the extensive science of the patented bacteria, DE111 *Bacillus subtilis*,* that has demonstrated unmatched probiotic support for the body's intestinal microbiome by crowding out undesirable bacteria in order to maintain healthy gut flora and promote the gut barrier's function while also supporting the normal immune reaction of intestinal cells.

Scientifically Formulated W/ *Bacillus subtilis*

Exciting new research has shown *Bacillus subtilis* to be a highly effective, stabilized probiotic organism that survives stomach acid during digestion. It is able to persist in the GI tract by increasing its numbers and then re-sporulating.

More Than 30 Studies

*More than 30 studies have been performed to confirm the safety and efficacy of *Bacillus subtilis* DE111. Multiple human clinical studies support DE111's benefits for digestive and immune health. All studies are IRB-approved, double-blind, randomized and placebo controlled.

What Makes A Probiotic Formula Truly Worthwhile?

Here's what to look for. The key factors below are especially critical when you are evaluating whether a probiotic formula is truly worthwhile:

- The formula contains probiotic bacteria types that are effective.
- The probiotic bacteria are known to remain stable for long periods of time.
- The probiotic bacteria are able to remain alive for long periods of time.
- The probiotic bacteria are capable of reaching the intestines to colonize there.
- The probiotic bacteria are able to thrive and build up their numbers in the intestines.

These statements have not been evaluated by the Food and Drug Administration. These products are not intended to diagnose, treat, cure or prevent any disease.

Feel The Effect

This premier quality formula is fermented using a unique probiotic culture which allows rapid delivery and superior bioenergetic dynamics. Many people say they can feel the effect of this product *the very first time they take it.*

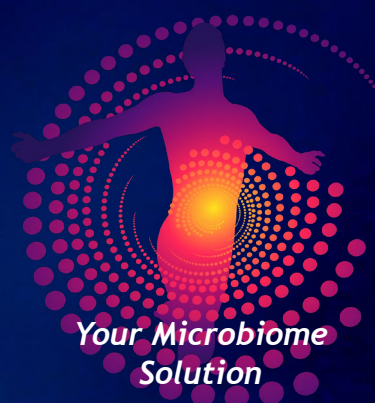

Promotes Deep, Restful, REM Sleep

Are you enjoying restful nights and radiant days? If you need more help, then PRL's Melatonin-ND™ is your product of choice. Experience an industry first with probiotic-fermented melatonin that **promotes deep, restful, REM sleep.** You and your family will feel the PRL difference!

PRL's Independent USP Certification: Ensuring The Best Product Quality

In today's climate of increased customer concerns about the quality of dietary supplements across the U.S., PRL has chosen to voluntarily undergo the rigorous process of attaining and maintaining our USP Certification, a very prestigious manufacturing designation.

This independently verified USP Dietary Supplement Verification Program helps enhance brand recognition by promoting the manufacturer's solid commitment to produce verifiable quality products for consumers. Only dietary supplement products that meet the program's strict testing and evaluation criteria are awarded the distinctive USP Verified Mark. To date, only a handful of dietary supplement manufacturers across the U.S. have been awarded this coveted USP Certification. PRL is proud of its dedicated multi-team that has worked hard to attain and maintain this prestigious manufacturing designation.

The FermExcel-100™ fermentation process is a revolutionary, highly absorbable delivery system made with unique probiotic-cultured technology specific to the raw material it is culturing. The FermExcel-100™ process is not just one process but is tailored individually to the type of plant nutrients that are being fermented. Each plant nutrient undergoes a carefully crafted fermentation process that encompasses specific scientific measurements such as humidity, timing, temperature levels and the use of the most ideal starting probiotic culture in order to create exceptional nutrient quality and potency.

Gallbladder-Associated Nutrients

Gallbladder-ND™ is a probiotic-fermented, botanically-based formula that is a nutritional industry innovation! This high-quality, time-tested blend is a foundational product with **gallbladder-associated nutrients** and is an excellent formula to include in one's daily health routine.

Fermented With A Probiotic Micro-Culture

The nutrients in Gallbladder-ND™ have been fermented with a probiotic micro-culture under controlled conditions which allows excellent oral uptake and increased bioavailability of the full spectrum of benefits. Gallbladder-ND™ contains premier quality gallbladder-associated nutrients for **advanced nutritional support**.

ND Technology™ (Novel Micro-Cultured Delivery)

This premier quality formula is fermented using a unique probiotic culture which allows rapid oral delivery with superior bioenergetic properties. Many people say they can feel the effect of this product *the very first time they take it*.

Beyond Raw

The process of fermentation naturally breaks down and preserves food elements when the aptly named “good” bacterial microorganisms proliferate and outnumber “bad” bacteria. Many think of fermented foods as “beyond raw”. When the appropriate fermentation process is used, the vitamins, minerals and antioxidants contained in the plant bulk are still there -- but infinitely more bioavailable. The process of fermentation takes the health benefits a step further by breaking down indigestible plant compounds and releasing the plant's full nutritional potential so that it is optimally bioavailable to the body.

Delivers Comprehensive Support For The Cardiovascular System

Cardio-ND™ is a win-win for health-conscious people with its probiotic-cultured botanical formula that not only improves bioavailability, **but includes beneficial probiotics**, all in the same product. Cardio-ND™ provides a probiotic-fermented formula that is a nutritional industry first! The nutrients in Cardio-ND™ have been micro-cultured and micro-digested under controlled conditions to **deliver comprehensive support for the cardiovascular system**.

Cardiovascular-Associated Nutrients

The diverse phytonutrient profile of this formula has made it one of our most popular practitioner formulas with **cardiovascular-associated nutrients**. Don't just look for a formula with heart-associated nutrients - look for one with improved bioavailability.

ND Technology™ (Novel Micro-Cultured Delivery)

This premier quality formula is fermented using a unique probiotic culture which allows rapid oral delivery with superior bioenergetic properties. Many people say they can feel the effect of this product *the very first time they take it*.

Help Ensure Digestion And Absorption Of Nutrients

Fermentation enhances the digestibility of nutrients, making them more bioavailable. Fermentation helps ensure that the digestion and absorption of plant nutrients is optimized. The process of fermentation breaks down plant compounds to release their full nutritional potency. The end result helps to ensure maximum absorption and digestion.

Probiotic-Fermented Resveratrol

Premier Resveratrol features probiotic-fermented resveratrol, a specialized agent for cell health. This formula also **supports the immune response**.

Delivers Premier Cardiovascular Support

In addition, this formula delivers premier **cardiovascular support**. It provides premier antioxidant activity in **supporting healthy scavenging free radicals**.

ND Technology™ (Novel Micro-Cultured Delivery)

This premier quality formula is fermented using a unique probiotic culture which allows rapid oral delivery with superior bioenergetic properties. Many people say they can feel the effect of this product *the very first time they take it*.

Feed Your Microbiome With Beneficial Postbiotics

Although a healthy, naturally diverse, intestinal microbiome should be able to produce all the postbiotics that a body needs, regularly consuming the SAD (Standard American Diet) and coming into frequent contact with environmental stressors (which includes exposure to pesticides, antibiotics, chlorine in water, smoking, etc.) can compromise this likelihood and in turn, your vitality may plummet.
